PROJECTS

Festive Frozen Food: Spearheaded the development of an innovative food ordering application using Java. The app empowers users to personalize their food orders with a wide range of customization options, ensuring a seamless and delightful ordering experience. The interface boasts a modern design, enhancing user engagement and satisfaction.

Doctor Appointment System (FYP): Designed and implemented an Android application that facilitates patients in scheduling online appointments with doctors, ensuring ease of access through a user-friendly interface developed using Android Studio and Java, with Firebase integration. Additionally, doctors can register and accept appointments from patients.

EXTRA-CURRICULAR ACTIVITIES

Experimenting with Tech.
